- Excluded Services: Meals and beverages, Optional Excursions (such as snowmobiling, ice fishing etc.)

2 GUESTS

4 NIGHTS

This package is available from the middle of August 2024 to the end of March 2025. Package pricing is valid for 2024-2025 season only. Package can be transferred to 2025-2026, but with upgrade fee TBD. Booking the trip should be no later than 60 days ahead of desired travel dates, sooner booking will ensure optimal availability. This package is transferable to another traveler, free of charge, if your package has not been booked and confirmed. Airfare, meals, and activities are not included unless specifically listed under Trip Details. Dog sledding requires a basic fitness level and balance. You might have to help the dogs push the sled up some hills. Depending on the snow level or the available dog sled kennel, you might share a sled, have a sled on your own, run on forest trails or river trails. The tours are fully guided. Release of Liability & Claims form to be signed prior to tour start.

YUKON NORTHERN LIGHTS AND DOG SLEDDING

Put this package on your bucket list! The magic of the Yukon comes to life on this 5-day, 4-night northern adventure. Spend your days exploring Whitehorse, Canada from your centrally located hotel, enjoy a guided city tour, and embark on exciting daytime adventures such as ice fishing, snowshoeing, hiking and fishing. One of the highlights of this trip is the exhilarating dog sledding experience. You'll transfer by van to the dog kennel outside of Whitehorse, where you'll watch your guide harness the dogs and hitch them to the sled. Then, you'll have the thrilling opportunity to run your own dog team for approximately two hours, creating unforgettable memories of your northern adventure. At night, we will whisk you away from the city lights to a cozy cabin or wall tent with an outdoor platform for an unobstructed view of the Aurora Borealis. You'll have three chances to view the mystical Northern Lights on this trip. Warm up with a coffee or tea as you wait by the fire for the Aurora show to start: an eerie green sheen that ripples into the night sky and arcs slowly to suddenly burst across the full expanse of the sky — nature at its best! The Solar Max is peaking this year. The next Autumnal Equinox is on September 22, 2024, and the next Vernal (Spring) Equinox is on March 20, 2025, both coinciding with the predicted Solar Maximum — a peak time of solar activity that comes around once every 11 years.
